### Fashionably Fighting MS at New York Fashion Week

During New York Fashion Week, Runway 7 Fashion hosted Project Lab Coat, an inspiring event that saw Mount Sinai's Corinne Goldsmith Dickinson Center for Multiple Sclerosis hit the runway in style. Faculty, staff, and families from the Center proudly donned custom-designed lab coats to raise awareness for MS.

### A Word From Our Director

Dear Colleagues and Friends,

We are excited to (re)introduce The Corinne Goldsmith Dickinson Center for Multiple Sclerosis's newsletter.

Whether you are a long-time reader or a new subscriber, this newsletter is here to keep you updated on the ever-evolving landscape of MS treatment and care at Mount Sinai. We hope the relaunch of this newsletter will keep our faculty, staff, patients, and families connected, informed, and inspired.

We are grateful to the late Donna Polisar, PhD, who for many years helped conceive and edit this newsletter. With her passing, along with the disruptions caused by the pandemic, we took a hiatus from publication.

Now we will resume sharing the Center's latest initiatives, highlighting achievements within our community, and providing insights into our work while celebrating our collective efforts and keeping you informed about developments that matter to all of us.

There are many exciting research initiatives underway at our Center along with newly expanded care programs. We have a new pediatric MS clinician bringing our neurology clinical staff to 11, and we have expanded our neuropsychology/cognitive assessment group.

We have a bright future ahead, and the newsletter is just one way we're ensuring that we stay united in our mission to provide the best treatment and care possible. Thank you for your continued support, and we look forward to all we will continue to achieve together.

**Fred Lublin, MD**

Saunders Family Professor of Neurology at Icahn Mount Sinai  
Director of The Corinne Goldsmith Dickinson Center for Multiple Sclerosis
